

Mutual NDA (sample)

This is a fixture PDF generated by sign-cli to demonstrate how a signed PDF with an embedded signature image is produced. The signature below was rasterised from SVG and stamped onto the page before the PAdES envelope was sealed. Tampering with either the image or the text would break the cryptographic verification.

A blue, stylized signature or scribble, possibly representing the word 'A' followed by a wavy line and a small loop at the end.

Signed:
